# DURO SPC HYBRID

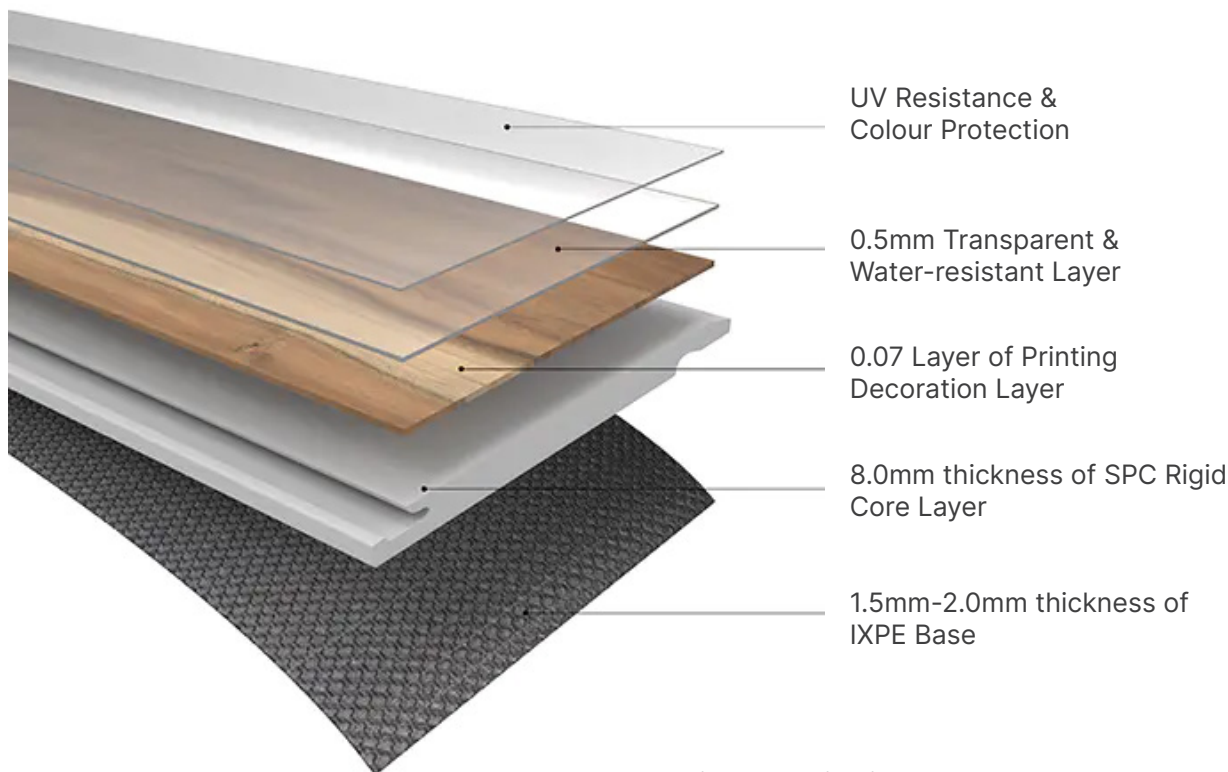

Flooring makes life better.

# Why Duro Hybrid Flooring?

Duro Hybrid Flooring boards are a robust and highly durable choices for modern interiors. Both of these series represent trend of utilizing latest manufacturing “co-extrusion” techniques to produce modern and stylish flooring. By extruding natural stone components with vinyl polymers, this technology creates “Rigid Core Board” is highly durable, dimensionally stable and impact resistant. Most outstandingly, RCB is 100% waterproof which can be installed throughout any housing area (including bathrooms).

There are 8 colours in our Hybrid Flooring Spectrum. An application of UV Coating forms a hard-wearing layer, delivers environmentally friendly consciousness. High-definition decoration film extruded into the solid core plus embossed designed textures provide vivid simulation of natural wood and deliver stunning authentic visual effects.

The basic material is a stone-polymers composite, making SPC flooring incredibly strong and durable, our product also rated as formaldehyde free, leading it completely safe to apply, install and use on residential zones or public areas.

# Specifications

<b>Pack Size</b>	1.2312sqm/pack, 3 planks

# Maintenance Tips

## Protection Tips

- Lay floor mats on exterior and interior door to trap sand and stone grinds from incoming traffic and always dry your feet when there is pool activity.
- Using rug or mat in high traffic areas help to reduce wear & scuffing.
- Soft pads are encourage to be stick on the base of furniture which had direct contact to the flooring and heavy loads.
- Do not slide or push while heavy furnitures remained contacts with flooring.
- Keep pet's claws well trimmed to avoid excess scratches and gouges.

## Regular Cleaning

- Sweep flooring regularly with either electrostatic broom, soft bristle brooms or wooden material floor mop.
- Dust off or clean with soft brustled vaccum head plug. Please ensure vacuum head is non-abrasive and come with no metal contact points.
- Remove spills promptly with an absorbent cloth or similar material.

## To achieve an optimal performance of your floor

- Woollen wheels is highly recommend to be placed over on protective matt to secure the surface from excessive grit and load concentrated wear.
- Place drip pans or protecting matt underneath plant's pot and pet's feeding zone or bedding area to avoid moisture ingress.
- Room temperature are recommended to always maintain its humidity rate around 35% ~50%. Constant site variations above or below these limits may require the use of air humidifier.
- Good air flow and ventilation ar e required to avoid over heating and extreme cold which caused excess moisture. Long-term exposure may result in changes on flooring surface.
- To resolves site specific circumstances, please always consult with your local flooring installer or retails for best advice and results.
