Benefits of using Hydrocore

Strong and Durable

The super hard core and robust print layer structure makes HydroCore outstanding against pressure, wear, and tear.

Aesthetic Appeal

Featuring high-definition printing and Embossed in Register (EIR) technology, Hydrocore floors offer vivid, lifelike timber textures that are visually stunning and comfortable underfoot.

Compatibility

Hydrocore is suitable for radiant heat systems, ensuring your comfort in all seasons.

Easy Installation and Maintenance

Designed for hassle-free installation and easy upkeep, Hydrocore floors are practical for both DIY enthusiasts and professional installers. Our innovative click system facilitates a smooth and secure installation process, making it an ideal choice for rapid renovations and new constructions.

Care and Maintenance Tips

Cleaning Tips

- Avoid using abrasive or sharp vacuum heads, use soft mops and brooms.
- Avoid using bleaches, detergents, soaps, wax, oils and polishes.
- Avoid steam cleaners. Instead, use a microfiber, sponge, or damp mop. Squeeze out excess water; the floor will dry in less than 20-30 seconds after mopping.
- Avoid flooding the floor.
- Quickly address water spills.
- Immediately clean stains or sticky grime using a damp cloth or sponge with a floor care cleaner.
- Regularly remove dirt or grit as needed.

Precautionary Measures

- Avoid dragging or sliding heavy objects on the floor, such as kitchen furniture, beds, tables, and bookcases.
- Prevent objects with sharp legs, like high heels or sharp-edged castors, from direct contact with the floor. It's recommended to use protective pads to avoid concentrated wear damage.
- Shield the floor from prolonged exposure to high UV and heat caused by direct sunlight. Rapid temperature fluctuations can lead to floor joint issues and long-term fading. Consider using curtains, blinds, awnings, etc.
- Place doormats to trap excessive grit and dust from the outdoors.
- Keep your pet's nails trimmed regularly to minimize scratches.
- Maintain indoor temperatures and humidity within the range of 12-30 degrees Celsius and 30%-50%, respectively. Rapid changes can lead to floor plank expansion or shrinking, causing gaps, cupping, or peaking.
