The easy way to install hybrid flooring

Welcome to our simple guide for installing your new hybrid floors.

You're going to love just how quick and easy it is to lay your new hybrid floors over your existing subfloor.

[Print guide](#)

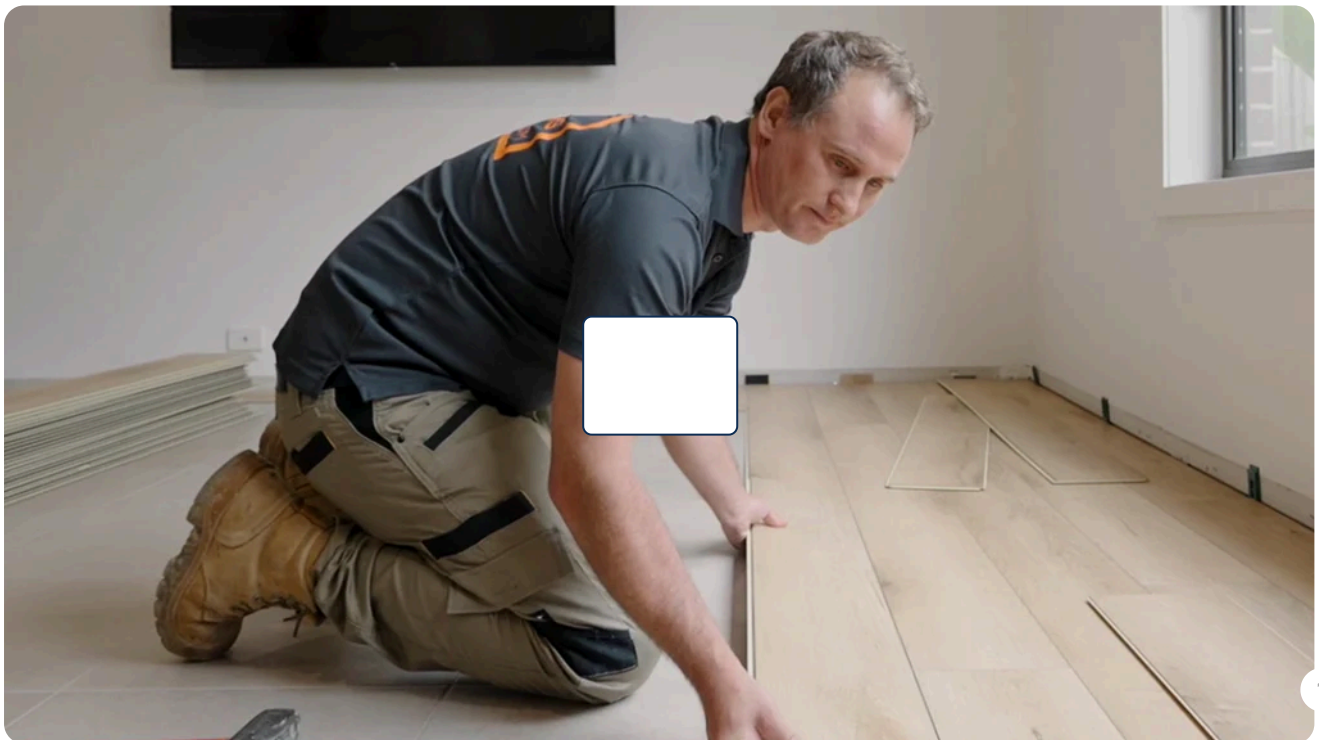

[Drop Saw](#)

[Floor Cutter](#)

Before you begin, check for the following

Signs of moisture in your subfloor

Subfloor is level and clean

Optimal laying conditions

Defective boards

Installing hybrid floors over tiles is easy

Our hybrid floors are designed to be laid over almost any pre existing subfloor including tiles. For optimal performance ensure your existing tiled floor is clean, flat, smooth and level with a minimal bevel. A levelling agent may be applied to grout lines if required.

1

OK it's time to start installing, let's take it step by step

1. Get organised

2. Set out

3. First row

4. Second row

5. Finish with trims

1

Lastly, Get Insta Ready

Congrats, you did it! Before you kick back and admire a job well done, don't forget to snap some photos and share your

new floors. Tag us on Instagram [@embeltonflooring](https://www.instagram.com/embeltonflooring), to really make our day.

Need some extra help?

Our experienced team are here to help on **1800 718 427** or chat with us online.

Why do I need to stagger my hybrid flooring?

Can I glue down my hybrid flooring?

Why do I have to level my subfloor?

What is an expansion gap?
