HYBRID FLOORING

8 mm hybrid

Built-in underlay

Beautiful floors.

Four carefully selected colours.

Neutral Oak | Coastal Blackbutt | QLD Spotted Gum | Driftwood

Made for everyday living

A durable hybrid floor with Australian timber and oak designs, a textured surface and pre-attached acoustic underlay.

Water-resistant flooring

The water-resistant SPC interior core delivers a strong, stable flooring solution for everyday interiors.

Scratch-resistant surface

An extra protective surface layer helps the floor stand up to everyday wear.

Built-in acoustic underlay

Pre-attached underlay helps reduce flooring noise and adds comfort underfoot.

Easy maintenance

Regular sweeping and mopping help keep the floor clean. Follow the manufacturer's care instructions.

Natural embossed texture

Timber-inspired grain and an embossed surface create the look and feel of natural wood.

Micro-bevelled edges

Subtle bevels define the boards and create a traditional timber-plank appearance.

2G click system

A click installation system designed for straightforward installation.

Matching accessories

Finish the floor with skirting or scotia and colour-coordinated trims.

Install and maintain in accordance with the manufacturer's instructions. Acoustic requirements depend on the complete floor and building system.

Choose your colour

Neutral Oak

888C09

Warm earthy tones with expressive oak grain.

Coastal Blackbutt

888C12

Warm copper and honey tones with flowing blackbutt grain.

QLD Spotted Gum

888C06

Distinctive Australian timber character and varied tones.

Driftwood

888C14

Light honey-beige tones with soft grey-taupe detail.

Colour swatches are taken from the supplied brochure. Printed and screen colours may vary; select from a physical sample.
